

SITECLOUD SECURITY MONITORING

Professional Monitoring Services

Sensera Systems' professional monitoring service provides an extra layer of protection and peace of mind when used in combination with SiteWatch PRO cameras. These advanced cameras are equipped with motion detection sensors that trigger real-time alerts including images and/or video when a potential threat is perceived. Our certified professional monitoring agents then verify whether the threat is valid. Emergency services will be alerted if a threat is validated, ensuring your valuable assets are protected from theft and vandalism. False positives, such as animals crossing a project site or wind-induced motion in the detection zone, are dismissed without action.

HOW SITECLOUD SECURITY MONITORING WORKS

MONITOR

If motion is detected by your SiteWatch PRO security camera during your specified monitored service hours, a video clip of the potential threat will be sent to a certified monitoring professional for immediate review.

VERIFY

All potential threats are reviewed by a monitoring professional for validation. If a threat is verified, immediate action is taken.

False positives are dismissed without further action.

RESPOND

Upon threat verification, the monitoring professional will take 1 of two pre-determined actions:

Option #1: Contact the specified project contact for a decision whether to contact emergency services.

Option #2: Contact emergency services and specified project contact simultaneously.

HIGHLIGHTS

- ✓ Deter and prosecute theft and vandalism
- ✓ Comply with insurance builders risk requirements for site security
- ✓ Reduce downtime from stolen materials and equipment
- ✓ UL Certified, CSAA Five Diamond central station. Multiple central stations nationwide for redundancy
- ✓ NDAA compliant camera systems

SiteCloud Security-Monitoring is a simple monthly service you can enable to provide professional monitoring on SiteWatch-PRO3 cameras. Configuration is simple and flexible, allowing you to set different schedules for day, night and weekends.

SiteCloud Security-Monitoring is also compatible with existing DIY monitoring of SiteWatch-PRO3 cameras. This means your cameras can be configured to notify you during working hours, and law enforcement after hours.

Both 'threat' and 'non-threat' events are logged in your SiteCloud account so you can review at any time.

SiteWatch PRO3 Smart Security Camera

Up to 13 MP All-Weather Camera for Real-time Monitoring

Flexible, Reliable, Affordable

Sensera Systems' SiteWatch PRO3 day/night site monitoring solution combines thermal, low-light and color cameras with IR illumination, video analytics and 4G LTE communications in one integrated system. This portable smart camera is perfect for 24/7 monitoring capable of real-time alert notifications (pushed to your email or mobile device) and continuous video recording. All video analytics are executed inside the camera, and only video relating to actual events is sent to the cloud for archival and viewing.
